Oh, hello!
I'm sorry, but I'm not interested in 'Lucid Dreams Final'.
but I'll need her brain's help.
S-o-Y-on, will you help me with the 'Lucid Dream Final' test at the laboratory?
The rich king exploded, so I can't do anything right now!
I'm going to be busy for a month.
So don't ask me to do anything!
Today I was wished dark trip again.
Why aren't you going?
Because if I sleep here, your dreams will be affected by my world, too.
That's good.
Then can you do the 'Lucid Dreams Final' test today?

What the Skylark Says

종달새가 말했다.

the Skylark says

by Lee Won Jin

14th Story

There's no other person as qualified as you, Jane Yoon.

You've used LD (Lucid Dream) since the beta test version and you have played it more than anyone.

There would be no information leaks.

I'm asking you, please!

Lucid Dream ver. C&P

Lucid Dream ver. C&P

The poster from version one is still on the wall.

Haha, I forgot to take it off.

SFX: Click click

Mm... wait a minute... I come here all the time, but the door is hard to unlock...

SFX: Clang

It worked.

SFX: Beep

Come in and make yourself at home.

SFX: Rustle

Now, are you ready? The LD First!

SFX: Rustle

Ta da!

An exclusive battery hasn't been decided yet, but we'll likely go with this model.

Do you want to try it?

?
You can wear it on your right ear.

The third is very different from what you played in versions one, two and beta.

There more a bit advanced than the former ones both in the graphics quality

So space was an issue and people who had a disability couldn't use it very well

Your body movement is detected according to gravity and your exact facial expressions.

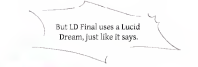
You couldn't fly with this.

It turns your body in directions it couldn't bend.

Movements impossible even for normal people.
It could only be resolved by computer programming.

And it worked well within the 'Game' concept

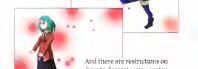
But LD Final uses a Lucid Dream, just like it says.



To fly in the sky, you have to pass some conditions,

So your body won't bend in a weird way.

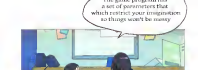
And there are restrictions on how to decorate your avatar.



It's your imagination that controls it.

The game programs has a set of parameters that which control your imagination so things won't be messy

Now, focus and follow what I tell you.
Yeah.



Now, I'm going to see if you have trouble with anything, please let me know.

SFX. Couch

I will send you an avatar object first.

SFX. Circle Circle

Whoom, you're ready. Just concentrate and try to move.

SFX. Circle

First, let's show yourself on the monitor.

SFX. Circle

Don't get too excited, and just focus.

SFX. Circle

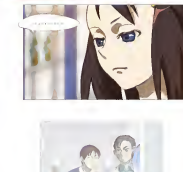
Imagine, that there, is no gravity...just imagine.....

SFX. Circle

SFX. Couple

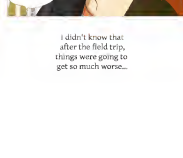
SFX. Startled

Yes, it would be unpleasant to share minds with someone you don't know. The appeal of the internet is its anonymity.
LD Final is really amazing, but only single player variants of the game should be played.
I am really caught off guard...



Dad's dream...

For dad, just one more time...



I didn't know that after the field trip, things were going to get so much worse...
